-AIRFLOW THROUGH TARP AND SIDE BOARD PROTECTION WITH LOCKING MECHANISM
Custom air flow through tarp with front housing shield that protects tarp from elements and debris. Locking mechanism at rear of dumpbox. Tarp has metal eyelets every two feet and there are tarp tie down hooks around the top of the box for ease of ensuring no escaping of the dumpbox contents.

-SIDE BOARD PROTECTION, added so that when loading, if loader hits the top of the side, board can be easily replaced with little cost vs hitting the steel side and doing major, costly damage.

-3 WAY ENDGATE Opens **barn door** style for loading of equipment or dumping contents (if dumping, there are door hold backs to hold the doors to the side of trailer to prevent damaging doors which would come in contact with the ground if dumpbox is fully raised). The end gate has **spreader chains** and a locking lever so can control spreading or dumping of material and the end gate can also be lowered to act as a **tailgate**.
